MEMORANDUM FOR ALL WINGS/REGIONS

FROM: NHQ/LGM

SUBJECT: New CAP Corporate Aircraft Decals

1. The November 2001 NEC voted to replace the current 8 and 11-inch corporate aircraft seal with a 6-inch lettered USAF AUX decal. In addition to the USAF AUX decal the NEC also approved the installation of a 12-inch CAP Emblem for each aircraft door.
2. The USAF AUX decal will be available in two colors, white and blue. The white decals are for aircraft that have the current CAP paint scheme or any other color that white letters will contrast with. The blue decals will be for aircraft that blue letters will contrast with.
3. Install the USAF AUX decal at the mid point of the vertical stabilizer, approximately the same position as the corporate seal. The corporate seal can be removed with a heat gun without damaging the paint. Install the CAP Emblem on each door centered vertically and horizontally. See attached example.
4. The new tail decals along with a fresh supply of the current wing decals will be available for ordering at no cost from CAP Supply Depot after the first of April. We request all Regions and Wings determine the number of blue and white tail decals, CAP Emblems and wing decals required by "N" number and submit a request by email to bexner@capnhq.gov. **No phone calls please.** Decals should not be ordered for aircraft scheduled for paint within the next twelve months, as they will be supplied in conjunction with the paint request.
5. Please call LGM at 334-953-6032 if there are any questions.

Nelson E. Daniel
CAP, Chief Aircraft Management
